

Flat Surface Processing Machine

MODEL FK-1000A

FK-1000A is a half-automatic machine for flattening process of sensitive emulsion for screen panels. It can eliminate dust on the flat films with static eraser. It requires certain pressing angles and pressure. Unskilled workers can operate flattening process without failure.

Custom-made products are available for maximum frame size. Please contact us for detail.

■ Main specification

Processing form	Flattening flat films by manually pressing down with certain angle and pressures using blades
Acceptable frame size	320×320mm~1000×1000mm, t=15~40
Dust roller	2 adhesive roller with static protection type
Measures for static electricity	By anti-static brush
Back light	40W fluorescent lamp×3 (yellow filter)
Outer dimensions	1300(W)×800(D)×1750(H)mm*without switch
Mass	150Kg
Power source	AC100V 5A
Air supply	5Kg/cm ² or above (primary measurement)

* Specifications and design details may be subject to change. C-No. E100806M
